Section: DSTALGO

Due Date: 9 10, 2026

Activity 1

```
namespace WinFormsApp1
```

```
{
```

```
    public partial class Form1 : Form
```

```
    {
```

```
        public Form1()
```

```
        {
```

```
            InitializeComponent();
```

```
        }
```

```
        private void label1_Click(object sender, EventArgs e)
```

```
        {
```

```
        }
```

```
        private void label2_Click(object sender, EventArgs e)
```

```
        {
```

```
        }
```

```
        private void button1_Click(object sender, EventArgs e)
```

```
        {
```

```
            int number = Convert.ToInt32(textBox1.Text);
```

```
            if (number % 2 == 0)
```

```
            {
```

```
                label2.Text = "EVEN";
```

```
            }
```

```
            else
```

```
            {
```

```
                label2.Text = "ODD";
```

```
            }
```

```
        }
```

```
private void textBox1_TextChanged(object sender, EventArgs e)
{
}

private void label3_Click(object sender, EventArgs e)
{
}
}
```

Two side-by-side screenshots of a Windows application titled "Form1". The application has a title bar with standard Windows controls. The main area is titled "Odd or Even". Below the title is a label "Enter a Number:" followed by a text box. Below the text box is a "Check" button. Below the button is a label "Result". In the left screenshot, the text box is empty. In the right screenshot, the text box contains the number "12" and the "Result" label displays "EVEN".Two side-by-side screenshots of the same "Form1" application. In the left screenshot, the text box is empty. In the right screenshot, the text box contains the number "3" and the "Result" label displays "ODD".

Activity 2

namespace WinFormsApp2

```
{
    public partial class Form1 : Form
    {
        public Form1()
        {
            InitializeComponent();
        }

        private void textBox1_TextChanged(object sender, EventArgs e)
        {
        }

        private void label2_Click(object sender, EventArgs e)
        {
        }

        private void button1_Click(object sender, EventArgs e)
        {
            int number = Convert.ToInt32(textBox1.Text);

            if (number > 0)
            {
                label3.Text = "POSITIVE";
            }
            else if (number < 0)
            {
                label3.Text = "NEGATIVE";
            }
            else
            {
                label3.Text = "ZERO";
            }
        }

        private void label3_Click(object sender, EventArgs e)
```

}
```

The image shows two side-by-side screenshots of a Windows application window titled 'Form1'. The window has a title bar with standard minimize, maximize, and close buttons. The main content area is light gray and contains the text 'POSITIVE OR NEGATIVE' in bold. Below this, there is a label 'Enter a Number:' followed by a text input field. A 'CHECK' button is positioned below the input field, and a 'Results' label is at the bottom. In the left screenshot, the input field is empty. In the right screenshot, the input field contains the number '2', the 'CHECK' button is highlighted with a blue border, and the word 'POSITIVE' is displayed below the 'Results' label.
