1. Student Information

Main.cs

```cs
using System;

class Student Information
{
    static void Main()
    {
        Console.Write("Enter your name: ");
        string name = Console.ReadLine();

        Console.Write("Enter your course: ");
        string course = Console.ReadLine();

        Console.Write("Enter your year level: ");
        string yearLevel = Console.ReadLine();

        Console.Write("Enter your section: ");
        string section = Console.ReadLine();

        Console.WriteLine("\n    STUDENT INFORMATION");
        Console.WriteLine("Name: " + name);
        Console.WriteLine("Course: " + course);
        Console.WriteLine("Year Level: " + yearLevel);
        Console.WriteLine("Section: " + section);
    }
}
```

Output

```
Enter your name: Charles David S. Parizal
Enter your course: BSIS
Enter your year level: 2nd Year
Enter your section: BSIS02

    STUDENT INFORMATION
Name: Charles David S. Parizal
Course: BSIS
Year Level: 2nd Year
Section: BSIS02

=== Code Execution Successful ===
```

2. Basic Calculator

Main.cs

```cs
using System;

class Basic Calculator
{
    static void Main()
    {
        Console.Write("Enter first number: ");
        double num1 = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter second number: ");
        double num2 = Convert.ToDouble(Console.ReadLine());

        double addition = num1 + num2;
        double subtraction = num1 - num2;
        double multiplication = num1 * num2;
        double division = num1 / num2;

        Console.WriteLine("\n     RESULTS");
        Console.WriteLine("Addition: " + addition.ToString("F2"));
        Console.WriteLine("Subtraction: " + subtraction.ToString("F2"));
        Console.WriteLine("Multiplication: " + multiplication.ToString("F2"));
        Console.WriteLine("Division: " + division.ToString("F2"));
    }
}
```

Output

```
Enter first number: 8
Enter second number: 9

     RESULTS
Addition: 17.00
Subtraction: -1.00
Multiplication: 72.00
Division: 0.89

=== Code Execution Successful ===
```

3. Area of a Rectangle

Main.cs

Run

```cs
using System;

class AreaOfARectangle
{
    static void Main()
    {
        Console.Write("Enter length: ");
        double length = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter width: ");
        double width = Convert.ToDouble(Console.ReadLine());

        double area = length * width;

        Console.WriteLine("Area: " + area.ToString("F2"));
    }
}
```

Output

```
Enter length: 22
Enter width: 8
Area: 176.00

=== Code Execution Successful ===
```

4. Student Grade

Main.cs

Run

```cs
using System;

class StudentGrade
{
    static void Main()
    {
        Console.Write("Enter Prelim Grade: ");
        double prelim = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter Midterm Grade: ");
        double midterm = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter Final Grade: ");
        double finalGrade = Convert.ToDouble(Console.ReadLine());

        double average = (prelim + midterm + finalGrade) / 3;

        Console.WriteLine("Average Grade: " + average.ToString("F2"));
    }
}
```

Output

```
Enter Prelim Grade: 98
Enter Midterm Grade: 98
Enter Final Grade: 67
Average Grade: 87.67

=== Code Execution Successful ===
```

5. Boolean Input

Main.cs Run

```
using System;

class BooleanInput
{
    static void Main()
    {
        Console.Write("Are you a student? (true/false): ");
        bool isStudent = Convert.ToBoolean(Console.ReadLine());

        Console.WriteLine("Student: " + isStudent);
    }
}
```

Output

```
Are you a student? (true/false): True
Student: True

=== Code Execution Successful ===
```

6. Age Verification

Main.cs Run

```
using System;

class AgeVerification
{
    static void Main()
    {
        Console.Write("Enter your age: ");
        int age = Convert.ToInt32(Console.ReadLine());

        bool isAdult = age >= 18;

        Console.WriteLine("18 or older: " + isAdult);
    }
}
```

Output

```
Enter your age: 20
18 or older: True

=== Code Execution Successful ===
```

7. Full Name

Main.cs Run

```
using System;

class FullName
{
    static void Main()
    {
        Console.Write("Enter your first name: ");
        string firstName = Console.ReadLine();

        Console.Write("Enter your last name: ");
        string lastName = Console.ReadLine();

        string fullName = firstName + " " + lastName;

        Console.WriteLine("Full Name: " + fullName);
    }
}
```

Output

```
Enter your first name: Charles
Enter your last name: Parizal
Full Name: Charles Parizal

=== Code Execution Successful ===
```

8. Shopping Calculator

Main.cs

Run

```
using System;

class ShoppingCalculator
{
    static void Main()
    {
        Console.Write("Enter product name: ");
        string productName = Console.ReadLine();

        Console.Write("Enter price: ");
        double price = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter quantity: ");
        int quantity = Convert.ToInt32(Console.ReadLine());

        double total = price * quantity;

        Console.WriteLine("Product: " + productName);
        Console.WriteLine("Price: " + price.ToString("F2"));
        Console.WriteLine("Quantity: " + quantity);
        Console.WriteLine("Total: " + total.ToString("F2"));
    }
}
```

Output

```
Enter product name: Keyboard
Enter price: 9800
Enter quantity: 20
Product: Keyboard
Price: 9800.00
Quantity: 20
Total: 196000.00

=== Code Execution Successful ===
```

9. Salary Calculator

Main.cs

Run

```
using System;

class SalaryCalculator
{
    static void Main()
    {
        Console.Write("Enter employee name: ");
        string employeeName = Console.ReadLine();

        Console.Write("Enter hours worked: ");
        double hoursWorked = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter hourly rate: ");
        double hourlyRate = Convert.ToDouble(Console.ReadLine());

        double salary = hoursWorked * hourlyRate;

        Console.WriteLine("Employee Name: " + employeeName);
        Console.WriteLine("Hours Worked: " + hoursWorked.ToString("F2"));
        Console.WriteLine("Hourly Rate: " + hourlyRate.ToString("F2"));
        Console.WriteLine("Salary: " + salary.ToString("F2"));
    }
}
```

Output

```
Enter employee name: Charles Parizal
Enter hours worked: 4
Enter hourly rate: 20000
Employee Name: Charles Parizal
Hours Worked: 4.00
Hourly Rate: 20000.00
Salary: 80000.00

=== Code Execution Successful ===
```

10. Mini Student Information System

Main.cs

Run

```cs
using System;

class MiniStudentInformationSystem
{
    static void Main()
    {
        Console.Write("Enter student name: ");
        string name = Console.ReadLine();

        Console.Write("Enter course: ");
        string course = Console.ReadLine();

        Console.Write("Enter age: ");
        int age = Convert.ToInt32(Console.ReadLine());

        Console.Write("Enter year level: ");
        string yearLevel = Console.ReadLine();

        Console.Write("Enter first grade: ");
        double grade1 = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter second grade: ");
        double grade2 = Convert.ToDouble(Console.ReadLine());

        Console.Write("Enter third grade: ");
        double grade3 = Convert.ToDouble(Console.ReadLine());

        double average = (grade1 + grade2 + grade3) / 3;

        bool isAdult = age >= 18;

        Console.WriteLine("\n     STUDENT INFORMATION");
        Console.WriteLine("Name: " + name);
        Console.WriteLine("Course: " + course);
        Console.WriteLine("Age: " + age);
        Console.WriteLine("Year Level: " + yearLevel);
        Console.WriteLine("Grade 1: " + grade1.ToString("F2"));
        Console.WriteLine("Grade 2: " + grade2.ToString("F2"));
        Console.WriteLine("Grade 3: " + grade3.ToString("F2"));
        Console.WriteLine("Average Grade: " + average.ToString("F2"));
        Console.WriteLine("18 or Older: " + isAdult);
    }
}
```

Output

```
Enter student name: Charles David S. Parizal
Enter course: BSIS
Enter age: 20
Enter year level: 2nd Year
Enter first grade: 98
Enter second grade: 96
Enter third grade: 99

     STUDENT INFORMATION
Name: Charles David S. Parizal
Course: BSIS
Age: 20
Year Level: 2nd Year
Grade 1: 98.00
Grade 2: 96.00
Grade 3: 99.00
Average Grade: 97.67
18 or Older: True

=== Code Execution Successful ===
```
